01 / ABOUT

I design expressive systems.

I am a Computer Science graduate from the University of Brasília (UnB), specializing in creative technology and game development. I served as principal programmer and game designer on Dream Delirio's and XIII — A Final Game of Tarot with Death. XIII is available on Steam, while Dream Delirio's has a Steam page and a playable demo. My work spans gameplay systems, Unity and Godot development, custom C++/SDL2 engines, shaders, procedural graphics, audio integration with FMOD and Wwise, and performance optimization. I am also a Guest Lecturer in Computer Graphics at UnB.

EDUCATION · 2020/2–2025/2

B.Sc. in Computer Science
UNIVERSITY OF BRASÍLIA (UNB)

FIRA SOFT · NOV 2024–NOV 2025

Game Development Intern
Unity · C#

INDEPENDENT · 2024–PRESENT

Principal Programmer · Game Designer
Dream Delirio's

TEACHING · 2026.2–PRESENT

Guest Lecturer
Computer Graphics · UnB

Selected work.

Dream Delirio's

A psychedelic arena shooter where breakfast becomes weaponry. I led programming and game design across gameplay systems, procedural waves, cards, UI, shaders and FMOD audio.

UNITY

GAME SYSTEMS

STEAM ↗

Design. Velocity. Death.

A fast-paced endless runner made for GMTK Game Jam. Pilot a ship through an endless track, dodge obstacles and collect boosters to keep the run alive.

UNITY

PROCEDURAL GRAPHICS

ITCH.IO ↗

Retro Arsenal

A 2.5D boomer shooter made for Game Jam Plus. I contributed to gameplay design and implementation in a team combining 2D and 3D art.

UNITY

GAMEPLAY

ITCH.IO ↗

XIII — A Final Game of Tarot with Death

Winner of Game Jam UnB and later released on Steam and Xbox. Principal Programmer and Game Designer with a focus on UI/UX and graphics.

UI/UX

GRAPHICS

VIEW XBOX ↗

Hunger

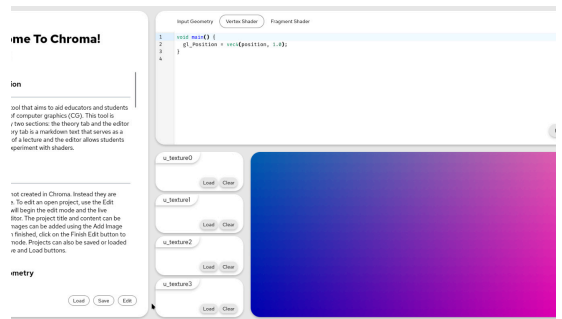

Built in a custom C++ engine over two months. Solo programmer in a team with four artists. Winner of Best Game, Best Art and Best Implementation at UnB's 11th Digital Games Exhibition.

C++

CUSTOM ENGINE

GITHUB ↗

YOUTUBE ↗

Chroma

A browser-based tool for learning computer graphics through live vertex and fragment shader editing. It combines Three.js rendering, theory tabs, textures, geometry and camera controls, project save/load and compile feedback.

THREE.JS

GLSL

SHADER TOOLS

DEMO ↗

GITHUB ↗

Plush Time

Contracted to enhance game feel across minigames through juice, special effects and player-experience improvements for this 1-6 player local and online party game.

03 / TOOLS

Languages

C, C++, C#, Rust, Python, JavaScript, TypeScript, GDScript, GLSL, HLSL and Assembly RISC-V. Shader programming, graphics programming and performance optimization.

Development

Unity, Godot, Raylib, SDL2, OpenGL, WebGL, Vulkan, FMOD, Wwise, Git, Blender, Fusion 360, SQL, HTML/CSS, Steam, Xbox, Itch.io and procedural generation.

04 / CONTACT

Let's make
something playable.

Open to freelance work, collaborations, and conversations about creative technology and real-time graphics.
